SUMMARY

Front-End Developer building bilingual (English / Arabic, RTL) web products with Next.js, TypeScript and Tailwind CSS at iFikra. Shipped features through Git pull requests in two team internships and built 9+ live React / Next.js projects — from SSR/SSG apps with authentication and payments to a full-stack TypeScript app on a Strapi REST API. B.Sc. in Electronics & Communications Engineering and co-founder of Vectos, a $1,000-funded health-tech startup.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & State: React.js, Next.js (App Router, SSR/SSG), React Hooks, Redux Toolkit, RTK Query, Context API, TanStack Query (React Query)
Styling & UI: Tailwind CSS, Sass/SCSS, Material UI, Framer Motion, Responsive Design, RTL & i18n (next-intl)
Data & Forms: REST APIs, Axios, Yup, Authentication (NextAuth, JWT)
Tools: Git, GitHub, Figma, Vite, Vercel, Strapi, Sanity CMS, WordPress / Elementor

EXPERIENCE

Front-End Developer Intern — iFikra | Alexandria | Oct 2026 – Present

- Build a bilingual (English / Arabic, RTL) dental platform — patient website and clinic dashboard — with Next.js, TypeScript and Tailwind CSS.
- Shipped the Blog, Pricing, Testimonials and Appointment pages, fully localized with next-intl, through Git feature branches and pull requests.
- Build medical websites with WordPress & Elementor.

Front-End Developer Intern — DevOra | Remote | Sep – Oct 2026

- Built the web front-end of Smart Laundry, a laundry ordering & delivery platform, with React, TypeScript, Vite and Tailwind CSS in a cross-functional team (UI/UX, backend, Flutter, AI, QA).
- Delivered the customer pages (services & cart, order tracking, profile & addresses, AI assistant) and the admin dashboard through 8 merged pull requests.
- Implemented protected / guest route guards and Zustand stores for authentication and saved addresses.

Front-End Developer (Full-time) — Arabia IT | Egypt | Sep – Nov 2023

- Contributed React features to an existing production project and helped build a second project from scratch alongside a team of engineers.

Front-End Team Leader — SEFF (Software Engineering For Future) | Remote | Jul – Sep 2023

- Led a 12-member team as team leader and mentor to build a complete React.js website, merging HTML, CSS and JavaScript work into one consistent, responsive product.

PROJECTS

- Taskflow — Full-Stack Todo App (React, TypeScript, TanStack Query, Strapi 5): typed task manager with authentication on a Strapi REST API; cut the bundle from 3.4 MB to 468 KB with lazy loading. to-do-full-app.vercel.app
- FoodAway (Next.js, NextAuth, Stripe, Sanity CMS): SSR/SSG pages for SEO, authentication, Stripe checkout and CMS-managed content. food-away.vercel.app
- Vectos — Smart-Shoe Health Dashboard (React, Recharts, ThingSpeak API): live sensor dashboard (heart rate, SpO_2, temperature, fall detection) connected to Flask ML models. github.com/osama24680/Vectos

EDUCATION

B.Sc. in Electronics & Communications Engineering — AASTMT, College of Engineering | Sep 2019 – Jan 2025
Graduation project: Vectos (formerly ShoesFit), smart shoes for early health-risk detection — grade A+, $1,000 funding and Top 10 at Plan International, 7th at AAST Rally.

CERTIFICATIONS & ACTIVITIES

Certifications: Front-End Diploma — SEFF (99.38%) · Front-End Diploma (React) — Route · IBM Data Scientist — DEPI (MCIT) · Cisco CCNAv7: Introduction to Networks
Activities: Upwork freelancer (2 client projects, 5.0★) · ACPC competitor · IEEE AAST Student Branch (web developer & designer) · IEEE Alexandria SB (ML member) · RoboPirates competition
